Public Engagement and Communications Plan

Executive Summary

Communicating with and engaging the public are key to achieving our vision of One Learning Community. As a School District serving about 20,000 students and a population of over 200,000, we have a responsibility to provide essential information and tools for parents and community to use in understanding and engaging with the public education system. We know parents and community partners are key to a student's success.

Board of Education, School District level, and school decision-making should be open and transparent to encourage broad understanding and involvement of students, parents and community. Our schools, Board policy, and District operational decisions are stronger when informed by the needs of the broad community. We must be clear about when and how the public has opportunities to provide input into decisions, and how that public input will be used.

As a District that is responsive to the changing needs of students, staff and the community, we must find ways to be innovative in how we do our work, and strengthen relationships and community networks. As one of the largest employers and land-owners in the Greater Victoria region, we also have an important role in the fabric and vibrancy of neighbourhoods. Schools bring people together. They are a community resource and hub for education, recreation, entertainment, and community connectedness.

It's important that we are mindful of and responsive to what the community needs and the role the District has in supporting community well-being.

Mission	Vision
We ensure the School District, the Board and our schools are accessible and connected with the community. We encourage public input into decision-making.	Our world class public education system reflects the needs and wants of the community we serve. Parents are informed, and the District and Board share and receive quality information through open relationships with parents, students and our local community.
