Construction to Begin for Spectrum Community School's New Turf Field

In July 2025, the Greater Victoria School District shared that the project to build a new all-weather turf field with lighting at Spectrum Community School was approaching its fundraising goal.

The Greater Victoria School District is pleased to announce that it will be moving forward with construction of the turf field without lighting at this time and is committed to exploring future funding opportunities to install permanent lighting.

Beginning in January 2026, crews will be on site to implement tree protection measures and construct an access road into the project area. A gate off Burnside Road West will serve as the team's entry point, and the new temporary road will allow construction vehicles to reach the site without traveling through the school parking lot.

Once fully funded, this project will not only provide Physical Education and Health classes with access to a modern new facility but will also support the school in hosting athletic events, community gatherings, and strengthening partnerships with local organizations and sports teams.

If you have any questions, please reach out to any of the Admin Team.
