Update #12 – Turf Construction at Spectrum

Images by Spectrum Student Sawyer Stevens

Over the coming weeks, construction crews main focus will be on field excavation, placing and compacting base material, and continuing to build the field structure in preparation for future lighting installation. Crews will also be completing some electrical backfilling and water-related work as scheduling allows.

Ongoing site safety measures will remain in place, including maintenance of silt fencing for sediment control and snow fencing to define the work zone. Tree protection fencing will continue to be monitored and maintained as required. A traffic control person will also be present as there will be an increase in construction traffic accessing the site at the Marigold/West Burnside Road intersection.

If you have any questions, please reach out to any of the Admin Team.
