Update #13 – Turf Construction at Spectrum

Images by Spectrum Students Sawyer Stevens and Rocky O'Connor

Over the coming weeks, the construction crew will continue with field excavation and site preparation work. This includes digging, hauling and placing material, shaping the berm around the field area, and preparing the field base to the required depth below the finished grade. Work is also underway to place and compact the sub-base gravel that will support the field structure.

Ongoing site safety measures will remain in place, including maintenance of silt fencing for sediment control and snow fencing to define the work zone. Tree protection fencing will continue to be monitored and maintained as required. A traffic control person will also be present as there will be an increase in construction traffic accessing the site at the Marigold/West Burnside Road intersection.

If you have any questions, please reach out to any of the Admin Team.
