Update #15 – Turf Construction at Spectrum

Photos by Spectrum Student Sawyer Stevens

This week, the construction crew has almost completed the field's sub-base layer. Roll tests are being conducted to ensure the surface is properly compacted and ready for the next phase. Next week, crews will begin installing the field's drainage system to address water accumulation on the field to help keep the surface usable year-round. Work on the lighting system is also expected early next week.

Ongoing site safety measures will remain in place, including maintenance of silt fencing for sediment control and snow fencing to define the work zone. Tree protection fencing will continue to be monitored and maintained as required. A traffic control person will also be present as there will be an increase in construction traffic accessing the site at the Marigold/West Burnside Road intersection.

If you have any questions, please reach out to any of the Admin Team.
