Update #16 – Turf Construction at Spectrum

Photos by Spectrum Student Sawyer Stevens

Next week, work on the new field will continue with the installation of the underground drainage system to help manage water and keep the playing surface in good condition. Crews will also be shaping the berm around the field and completing any additional fill work needed to keep the project moving forward. Work on the lighting system is also expected early next week.

Ongoing site safety measures will remain in place, including maintenance of silt fencing for sediment control and snow fencing to define the work zone. Tree protection fencing will continue to be monitored and maintained as required. A traffic control person will also be present as there will be an increase in construction traffic accessing the site at the Marigold/West Burnside Road intersection.

If you have any questions, please reach out to any of the Admin Team.
