Week 2 Update – Turf Construction at Spectrum

We're excited to see construction begin on Spectrum's new artificial turf field! This week, crews have started to put up protective fencing around the construction site and have created temporary access through the school parking lot until a temporary road is built from Burnside Road West. This road will enable construction vehicles to access the site safely, eliminating the need to use the school parking lot. Until the Burnside Road West access point has been created, we would like to remind our community to be careful in and around our parking lot as construction crews continue to work in the area. Next week, crews will be on site as they continue to bring in construction materials, install tree protection measures, and work on the temporary access road from Burnside Road West.

We look forward to seeing this project take shape and can't wait for our students and community to enjoy the new facility once it's completed.

If you have any questions, please reach out to any of the Admin Team.
